

NEW from air spectrum

dust control additive

dst 4 has been specially designed to prevent emissions of dust emitted by vehicles vehicular traffic.

dst 4 is a water dispersion of vinylic polymer.

application environment

dst 4 has been specifically designed to control dust in various applications:
• road constructions • mining operations • quarries • race courses/tracks etc.

how it works

With the recommended dosage, **dst 4** will form a solid crust that will resist truck tyres and rain. It will reduce the number of passages in road surface treatment and the resulting treatment cost.

dosage

Apply 50kg of **dst 4** per 10,000 litres of water. Three to four spray passages are recommended in order to form a solid crust. It is not necessary to pre-dilute.

physical - chemical properties

appearance	liquid
colour	white
molecular weight	high
bulk density (g/cm ³)	1.1
bulk viscosity (cps)	< 1000
maximum concentration (g/l)	10
storage temperature (°C)	5-30
shelf life (months)*	6

*when stored inside a building at stable temperature between 5°C and 30°C

“ • water dispersed
• resists truck
tyres and rain ”

say no to dust with dst!

Air Spectrum Environmental is the leading supplier of Odour Control and Dust Suppression systems and service; supplying an extensive range of liquid neutralisers to both UK and International markets.

dst is our range of dust suppression additives using industry tested biodegradable polymer based components. The dst range offers various treatment methods for a wide range of applications.

dst dust control additive

working in 4 ways:

encapsulating • adhering • compacting • protecting

applications:

arenas • dirt roads • conveyors • earthworks
embankments • stockpiles • mining

service agreements

Air Spectrum can offer a range of service level agreements, to ensure equipment efficiency and reducing running costs. Our comprehensive service network gives full UK wide coverage, ensuring market leading response times to meet customer requirements.

odour consultancy service

With expert knowledge of solutions and control measures, Air Spectrum's consultants will offer unbiased and accurate advice about appropriate abatement and control measures.

Our service also includes Category Odour Scaling, Sampling & Analysis. With expert knowledge of solutions and control measures, Air Spectrum can offer unbiased and accurate advice about appropriate abatement and control measures.

Air Spectrum operates to the highest standards and is accredited by a number of professional bodies. These include ISO 9001 quality standards accreditation as well as international environmental standard ISO 14001 accreditation.
