

## Odr neutralising additives

# Odr

NEUTRALISING  
ADDITIVES

### Application environment

Many waste, recycling, remediation, manufacturing and processing operations create odour. Non-treatment of odour release can pose a serious nuisance to neighbouring communities and employees. The likely reaction to complaint if ignored, is that it can lead to considerable negative impact on the operator.

Complaints, authority investigation and non-compliance with air pollution regulations are issues that operators cannot afford to ignore. They can lead to operating restrictions, costly fines, bad publicity and even closure. Apart from potential prosecution, operational inefficiencies can arise from increased levels of staff absenteeism because of illnesses caused by airborne pollutants.

### Product aim

Air Spectrum's *Odr* range of odour neutralisers is specifically designed to negate the threat of these issues, by controlling odour in any environment. Its primary function is to neutralise odour before it leaves the site boundary or processing outlet. Operators using *Odr* protect their neighbours from exposure to annoying smells, eliminating the possibility of complaint or investigation and ensuring compliance with air pollution regulations.

### How it works

*Odr* is a best-selling range of organic, non-toxic, food-grade odour neutralisers using bio-degradable essential oils collected from sustainable resources. Some *Odr* types are fragranced, but unlike masking chemicals that can cause greater environmental problems than they resolve, *Odr* neutralises malodour by removing it from the air. There is a type of *Odr* for every application, see overleaf for details of the full range.

When used in Air Spectrum's odour control systems, the appropriate *Odr* from the range is efficiently atomised to produce a very fine mist. The mist interacts with the odour particles for a sufficient time to neutralise them. Having absorbed the odorous components, *Odr* breaks down the molecular structure to form harmless, non-volatile salts that degrade naturally.

The non-toxic and food-grade nature of *Odr* allows it to be used both in outdoor environments and within buildings. It is harmless to humans and animals and will not cause irritation or health complaints.

**Odr<sup>1</sup>**  
NEUTRALISING  
ADDITIVE

**Odr1 – for light odour problems.**  
A neutraliser for use where light or intermittent odour is a problem in workplaces, such as composting facilities or landfill sites. Available in a variety of fragrances.

**Odr<sup>2</sup>**  
NEUTRALISING  
ADDITIVE

**Odr2 – for heavier odour problems.**  
A neutraliser for use in facilities where higher levels of neutralisation are required, such as waste-transfer stations. Available in a variety of fragrances.

**Odr<sup>3</sup>**  
NEUTRALISING  
ADDITIVE

**Odr3 – for constant odour problems.**  
A neutraliser for use where there is a constant stream of odour, such as at landfill sites, causing discomfort to employees and neighbours. Available in a non-fragranced, Natural form, or in our standard range of fragrances.

**Odr<sup>4</sup>**  
NEUTRALISING  
ADDITIVE

**Odr4 – for high levels of odour problems.**  
A neutraliser for use where there are high levels of odour on an intermittent or constant basis, such as in food processing and manufacturing facilities. Available in a non-fragranced, Natural form, or in our standard range of fragrances.

**Odr<sup>5+</sup>**  
NEUTRALISING  
ADDITIVE

**Odr5+ – for super-strength odour abatement.**  
A neutraliser for use in locations where odour levels are extremely high and where hydrocarbons and mecaptans may be present, including oil refineries, high-odour manufacturing, abattoirs and effluent plants. Available in non-fragranced, Natural form only.

**Odr<sup>6+</sup>**  
NEUTRALISING  
ADDITIVE

**Odr6+ – for ultra-strength odour abatement.**  
A neutraliser for use in locations where odour levels are extremely high and where hydrocarbons and mecaptans may be present, including oil refineries, high-odour manufacturing, abattoirs and effluent plants. Available in non-fragranced, Natural form only.

**Odr<sup>7+</sup>**  
NEUTRALISING  
ADDITIVE

**Odr7+ – for the highest level of odour abatement.** A neutraliser for use where odour levels are constant and where hydrocarbons and mecaptans may be present, including oil refineries, high odour manufacturing, abattoirs and effluent plants. Available in non-fragranced, Natural form only.

Air Spectrum can also tailor odour control products for other specific purposes – please contact us for discuss your requirements.

## Fragrance options

**Odr 1-2** are available in fragranced form only

**Odr 3-4** are available in fragranced, Natural or non-fragranced (Natural) options

**Odr 5-7** are available in non-fragranced (Natural) form only.

## Fragrances available for Odr 1-4 are:

- Pine
- Eucalyptus
- Orange
- Bubblegum
- Vanilla
- Strawberry
- Green Grass
- Cherry
- Lemon
- Peppermint
